

MOVING SIMPLIFIED

HELPFUL GUIDES

How We Protect Your Belongings

At Moving Simplified, we understand the importance of protecting your belongings, and with years of experience, we have procedures in place to ensure their safety.

All Dressers, armoires, china hutches, tables, etc. will be padded, rubber band, and shrink-wrapped for maximum safety.

Your sofas will be shrink-wrapped and padded when necessary.

All chairs will be padded individually to ensure safety.

All mattresses are placed inside a mattress bag, ensuring its cleanliness and protection.

All of these precautions are performed prior to the piece leaving the room!

Our movers utilize any and all moving equipment available, ensuring the piece will travel from point A to B safely. We are unique in that we use Shoulder Dollies, allowing for our movers to almost effortlessly lift and maneuver any piece, along with Forearm Forklifts, which are used to move your mattress.

Both of these unique moving tools assist in moving your belongings safely and keeping our movers at %100 peak performance from start to finish!

We haven't forgotten the "tried and true" methods either: appliance dollies, box dollies, 4 wheel dollies, and sheer manpower are still used in all moves!

We have not overlooked the safety of your home or office interior either! We use door jamb and floor protectors to guarantee the safety of your belongings from start to finish.

We look forward to assisting you in your next move!
